MILESTONE AND ACTIVITY:

PLANNING Planning all the modules and features which are going to implement

We decided what are the software's and tools we need and install the required resources

We design all the modules like login page, dashboard, Academic details form etc.,

We are going to develop the predictor which uses the previous dataset and academic details of the student. In the phase we use some algorithm fix prediction

We are going to testing if we face any error we debug the error

DEPLOYMENT Finally we submit the project in GitHub
